#### What are the key risks that are specific to the Issuer?

The Issuer and its subsidiaries are subject to the following key risks:

- Starting from 15 September 2025, the Issuer and its subsidiaries are subject to the management and coordination of Banca Monte dei Paschi di Siena ("BMPS"), falling within the scope of its group ("MPS Group"). As part of the integration process, an extraordinary general meeting was held on 1 December 2025 in the contest of which the shareholders of Mediobanca approved the alignment of the financial year-end date of Mediobanca and its subsidiaries, i.e. 30 June, with that of the MPS Group, i.e. 31 December, starting from the financial year 1 January 2026 - 31 December 2026. Investors should take into account the inevitable discontinuity and limitations in the comparability of the Issuer's consolidated and individual financial statements after the integration into the MPS Group with the Issuer's historical consolidated and individual financial statements. The uncertainties also concern the manner in which the integration of Mediobanca and its subsidiaries into the MPS Group will be carried out. In fact, based on the public information available to date, no final decisions have yet been made regarding the actual corporate or organisational restructuring of the MPS Group following the merger with Mediobanca, including the possible merger by incorporation of Mediobanca into BMPS, or other corporate transactions involving Mediobanca and its subsidiaries.
- On 11 September 2025, S&P Global Ratings placed its 'BBB+' long-term issuer credit rating on Mediobanca on CreditWatch negative. According to S&P, the "CreditWatch placement reflects that the transaction could erode MB's creditworthiness due to its integration into a banking group with comparatively weaker franchise and higher risk profile". While acknowledging that the acquisition of Mediobanca could bring benefits to the commercial and financial position of the new entity, S&P believes that "the combined entity could end up with a lower credit profile than Mediobanca's stand-alone credit quality" and consequently they "could lower the rating on MB by one notch" also taking into consideration that "it might take some time for full benefits in the new group to materialize". On 15 October 2025, Fitch Ratings, following its decision on 4 September 2025, to revise the Rating Watch on Mediobanca's Long-Term Issuer Default Rating (IDR) (BBB) to Negative (RW), from Evolving – decided to align the Mediobanca's risk profile with that of BMPS, downgrading Mediobanca's long-term debt rating from 'BBB' to 'BBB-', with a 'Stable' outlook. On 1 October 2025, Moody's has downgraded the Mediobanca's long-term debt rating from "Baa1" to "Baa3" with "Positive" outlook, following the successful completion of the BMPS's takeover offer on Mediobanca shares. A further downgrade by rating agencies may adversely affect Mediobanca's ability to access liquidity instruments on favourable terms and could lead to an increase in funding costs. Such circumstances may have negative repercussions on the earnings, capital and financial situation of the Issuer.
- The operations, earnings capacity and the stability of the sector of the Issuer may be influenced by the trends on global financial markets and the macroeconomic scenario (with particular reference to growth prospects) in Italy. With reference to financial markets, the solidity, resilience and growth prospects of the economies of the countries in which the Issuer operates in particular will be especially important. The macroeconomic scenario currently reflects significant areas of uncertainty in relation to: (a) the Russian-Ukrainian conflict; (b) the conflicts in the Middle East; (c) the structural reforms being undergone by China; and (d) the possible international political and economic impacts resulting from the decisions of the new US administration.
- The business activities of both Mediobanca and its subsidiaries and their earnings and financial solidity depend also on the credit standing of their respective clients and counterparties. Mediobanca is exposed to the risks traditionally associated with credit activity. Accordingly, breach by its customers of contracts entered into and their own obligations, or the possible failure to provide information or the provisions of incorrect information by them regarding their respective financial and credit situation, could impact negatively on the earnings, capital and/or financial situation of Mediobanca.

- As of the date of the Drawdown Prospectus, the Issuer's capability to implement the actions and to meet the targets to be reached (the "Plan Objectives") contained in its 2023-26 Strategic Plan, as updated on 27 June 2025 for the period 2025-2028 depends on a number of circumstances, some of which are beyond the Issuer's control, including, but not limited to, the macroeconomic scenario, which could be compromised by the consequences deriving from the Russia/Ukraine conflict and from tensions in the Middle East and the changes in the regulatory framework. Furthermore, there is no certainty that the actions provided for in the Strategic Plan will result in the benefits expected from implementation of the plan objectives; if such benefits fail to materialize, the results expected by Mediobanca may differ, even materially, from those envisaged in the Strategic Plan, as updated. The acquisition of control by BMPS, as well as the change in the composition of the Mediobanca's Board of Directors, make it impossible - at present - to determine which of the Plan Objectives will eventually be pursued or modified due to the change in ownership and governance structures nor whether the projections included in the Update to 2028 will be confirmed or modified for the same reasons.
- The Issuer is subject to market risk, defined as the risk of the loss of value of the financial instruments, including sovereign debt securities, held by the Issuer as a result of movements in market variables (including, but not limited, interest rates, stock market prices and/or exchange rates) or other factors that could trigger a deterioration in the capital solidity of the Issuer and its subsidiaries.

A record of each payment so made will be endorsed on each Global Security, which endorsement will be *prima facie* evidence that such payment has been made in respect of the Securities.

**Payments in respect of Securities in definitive form:** All payments in respect of the Securities in definitive form shall be made against presentation and surrender of the relevant Securities at the specified office of any Paying Agent outside the United States by a cheque payable in the currency in which such payment is due drawn on, or, at the option of the holder, by transfer to an account denominated in that currency with a bank in the principal financial centre of that currency; provided that in the case of Euro, the transfer may be to a Euro account.

**Illegality and force majeure:** If the Issuer determines that the performance of its obligations under the Securities or that any arrangements made to hedge the Issuer's obligations under the Securities have become (i) illegal in whole or in part for any reason, or (ii) by reason of a *force majeure* event (such as an act of God, fire, flood, severe weather conditions, or a labour dispute or shortage) or an act of state, impossible or impracticable the Issuer may settle the Securities by giving notice to Securityholders.

Each holder of the Securities acknowledges, accepts, consents and agrees, by its acquisition of the Securities, to be bound by the exercise of, any bail-in power by the relevant resolution authority in respect of the Securities. Any exercise of such bail-in power or other action taken by a resolution authority in respect of the Issuer could materially adversely affect the value of and return on the Securities.

**Any restrictions on the free transferability of the Securities:** there are restrictions on sales of the Securities into, amongst other jurisdictions, the United States, the European Economic Area (including Italy), the United Kingdom and Japan.

#### **Where will the Securities be traded?**

Application has been made by the Issuer (or on its behalf) for the Securities to be admitted to trading on the regulated market of the Euronext Dublin with effect from or around the Issue Date.

Application has been made by the Issuer (or on its behalf) for the Securities to be admitted to trading on the multilateral trading facility of EuroTLX which is not a regulated market for the purpose of Directive 2014/65/EU with effect from or around the Issue Date.

The Issuer reserves the right to make further applications for the Securities to be admitted to listing and/or trading on additional markets/trading venues.

#### **What are the key risks that are specific to the Securities?**

The Securities are subject to the following key risks:

##### **General**

- The Securities may not be a suitable investment for all investors. Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be. An investment in the Securities, which are linked to the Underlying References, may entail significant risks not associated with investments in conventional securities such as debt or equity securities. Set out below is a description of the most common risks.

##### **Risks related to the structure of a particular issue of Securities**

- The Securities involve a high degree of risk, which may include, among others, interest rate, foreign exchange, time value and political risks. Investors should be prepared to sustain a partial or total loss of the subscription or purchase price of the Securities. Certain general risk factors related to the Securities referencing an Underlying Reference, including that the market price of the Securities may be volatile; that investors may receive no remuneration; that investors may lose all or a substantial portion of their principal in case of non-capital guaranteed Securities; that the Underlying References may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other securities or indices; that the timing of changes in an Underlying Reference may affect the actual yield to investors, even if the average level is consistent with their expectations; and Securities are of limited maturity and, unlike direct investments in an obligation of a Reference Entity,

investors are not able to hold Securities beyond the Settlement Date in the expectation of a recovery in the price of the underlying.

- The Issuer may, but is not obliged to, list or ask for admission to trading of Securities on a stock exchange or a trading venue. If the Securities are listed or admitted to trading on any stock exchange or trading venue, there can be no assurance that at a later date, the Securities will not be delisted or that trading on such stock exchange or trading venue will not be suspended. The Issuer or any of its Affiliates may, but is not obliged to, be a market-maker for an issue of Securities. However, during certain periods, it may be difficult, impractical or impossible for the entity acting as market-maker to quote bid and offer prices. Even if the Issuer or such other entity is a market-maker for an issue of Securities, the secondary market for such Securities may be limited.
- In case certain events, indicated in the terms and conditions, occurs with reference to the relevant Underlying Reference(s) or the Securities, the Calculation Agent and the Issuer have broad discretion to make certain determinations to account for such event(s) including to (i) make adjustments to the terms of the Securities and/or (ii) cause early settlement of the Securities, any of which determinations may have an adverse effect on the value of the Securities. The effects of coronavirus pandemic (such as the measures taken by governments and authorities in this respect) may cause the occurrence of the events indicated above and involve such adjustments to the terms of the Securities and/or early settlement of the Securities.
- The Terms and Conditions of the Securities are based on English law in effect as at the date of the Drawdown Prospectus, except for the status provisions applicable to the Securities and the contractual recognition of bail-in powers provisions, and any non-contractual obligations arising out of or in connection with such provisions, which shall be governed by, and construed in accordance with, Italian law. No assurance can be given as to the impact of any possible judicial decision or change to English law or administrative practice after the date of the Drawdown Prospectus.

#### **Risks relating to Underlying Reference Asset(s)**

- The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities early settlement or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.
- In addition to the credit risk of the Issuer, payments on the Securities are subject to the credit risk of any Reference Entities to which they are linked. Holders may lose their entire amount of principal invested and may not receive any payments of remuneration if Event Determination Dates occur. The financial condition and creditworthiness of a Reference Entity may change over time. Public information which is available in relation to a Reference Entity may be incomplete, misleading or out of date. The identity of each Reference Entity is subject to amendment as a result of corporate or other actions such as a merger or demerger. The risks associated with successor Reference Entity may be greater than the risks associated with the original Reference Entity. The credit risk to investors may further be increased if one or more Reference Entities and the Issuer are concentrated in a particular industry sector or geographic area, or if they have exposure to similar financial or other risks. Holders will have no claim against any Reference Entity and no interest in or rights under any obligation of a Reference Entity. An investment in the Securities is not equivalent to an investment in the obligations of a Reference Entity. The occurrence of a credit securities additional disruption event or a merger event may result in the Securities being settled prior to the Scheduled Settlement Date at their fair market value which may be an amount which is less than the outstanding notional amount of the Securities. Where settlement of the Securities following a Credit Event is determined by reference to a credit derivatives auction, the outcome of such auction may be affected by technical factors or operational errors or may be subject to actual or attempted manipulation, which may result in a lower payment to Holders. Where settlement is determined by reference to bid quotations sought by the Calculation Agent from third party dealers, the Calculation Agent will be entitled to seek quotations for eligible obligations of the relevant Reference Entity having the lowest possible market value. In certain circumstances, for example where a potential or unsettled credit event exists as at the Scheduled Settlement Date of the Securities or a resolution of a credit derivatives determinations committee is pending at such time, the settlement of the Securities may be postponed for a material period of time after the Scheduled Settlement Date. The Securities provide for exposure to a linear basket of Reference Entities through the application of a leverage factor, which increases the sensitivity of the Securities to adverse credit events affecting the Reference Entities. As a result of such leverage factor, the economic exposure of the Securities to the Reference Entities is greater than would be the case based solely on the relevant weightings of each Reference Entity in the linear basket. The Securities may apply an Auction Settlement Amount and/or a Credit Event Cash Settlement Amount that can be negative; any such negative amount will be deducted from the outstanding Notional Amount (subject only to a zero floor on the outstanding Notional Amount itself). As a result, investors are exposed to the risk of receiving a lower payment than would have been payable under otherwise comparable securities providing a zero floor on such amounts.

#### **Risks related to the market generally**

- Issue price of the Securities include placement fees. The placement fees shall be paid by the Issuer to the Distributor. Any such fees may not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market.

#### **Certain considerations associated with public offers of Securities**

- The Issuer has the right under certain conditions to withdraw the offer in relation to the Securities, which in such circumstances will be deemed to be null and void. Investors who have already paid or delivered subscription monies for the relevant Securities

will be entitled to reimbursement of such amounts, but will not receive any compensation that may have accrued in the period between their payment or delivery of subscription monies and the reimbursement of such amounts.

## RISK FACTORS

*The Issuer believes that the following factors may affect its ability to its obligations under the Securities. Most of these factors are contingencies which may or may not occur. In addition, factors which are material for the purpose of assessing the market risks associated with Securities are also described below.*

*The Issuer believes that the factors described below represent the principal risks inherent in investing in Securities, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Securities may occur for other reasons which may not be considered significant risks by the Issuers based on information currently available to it or which it might not currently be able to anticipate.*

*Investors should be aware that they may lose the value of their entire investment or part of it, as the case may be.*

*The purchase of Securities involves substantial risks and is suitable only for investors who have the knowledge and experience in financial and business matters necessary to enable them to evaluate the risks and the merits of an investment in the Securities. Before making an investment decision, prospective investors should ensure that they understand the nature of the Securities and the extent of their exposure to risks and that they consider carefully, in the light of their own financial circumstances, financial condition and investment objectives, all the information set forth in this Drawdown Prospectus and as supplemented from time to time.*

### **1. Material Risks that are specific to the Issuer and that may affect the Issuer's ability to fulfil its obligations under the Securities**

The risks below have been classified into the following categories:

- (A) *Risks related to the business of Mediobanca and its subsidiaries and to the sector in which they operate;*
- (B) *Risks related to the financial situation of the Issuer;*
- (C) *Risks related to legal and regulatory scenario.*

#### **(A) Risks related to the business of Mediobanca and its subsidiaries and to the sector in which they operate.**

The paragraph of the Fourth Supplement entitled "(A) Risks related to the business of Mediobanca and its subsidiaries and to the sector in which they operate" on pages 5 to 9 of the Fourth Supplement, is incorporated

by reference herein in the manner set out in the section entitled “*Documents Incorporated by Reference*”, and sets out a description of the risks related to the business of Mediobanca and its subsidiaries and to the sector in which they operate.

**(B) Risks related to the financial situation of the Issuer.**

The paragraph of the Fourth Supplement entitled “(B) Risks related to the financial situation of the Issuers” on pages 9 to 11 of the Fourth Supplement, is incorporated by reference herein in the manner set out in the section entitled “*Documents Incorporated by Reference*”, and sets out a description of the risks related to the financial situation of the Issuer.

**(C) Risks related to legal and regulatory scenario.**

The paragraphs of the Base Prospectus entitled (i) “(C) Risks related to legal and regulatory scenario - Risks related to changes in banking sector regulations” on pages 37 to 40 of the Base Prospectus and (ii) “(C) Risks related to legal and regulatory scenario - Risks related to changes in fiscal law” on page 40 of the Base Prospectus are incorporated by reference herein in the manner set out in the section entitled “*Documents Incorporated by Reference*”, and sets out a description of the risks related to legal and regulatory scenario.

**2. Risk factors relating to the Securities**

Other than as *expressly* excluded from the section entitled “*Documents Incorporated by Reference*”, the section of the Base Prospectus entitled “*Risks relating to the Securities*” on pages 42 to 123 of the Base Prospectus, are incorporated by reference herein in the manner set out in the section entitled “*Documents Incorporated by Reference*”, and sets out a description of the risk factors that are material to the Securities in order to assess the market risk associated with the Securities. The following risk factors relates to the specific characteristics of the Securities.

**1. *Securityholders are exposed to increased credit risk due to the Leverage Factor applied for the determination of the Reference Entity Notional Amount***

The Securities provide exposure to a linear basket of Reference Entities through the application of a Leverage Factor, which increases the sensitivity of the Securities to adverse credit events affecting the Reference Entities. As a result of such Leverage Factor, the economic exposure of the Securities to the Reference Entities is greater than would be the case based solely on the relevant weightings of each Reference Entity in the linear basket.

In particular, upon the occurrence of a Credit Event and the related Event Determination Date in respect of any Reference Entity, the Outstanding Notional Amount of the Securities will be reduced by an amount which reflects the application of the Leverage Factor for the determination of the Reference Entity Notional Amount and which will therefore be greater than the relevant weighting of the affected Reference Entity in the linear basket. Consequently, even a limited number of Credit Events may result in a disproportionately significant reduction of the Outstanding Notional Amount of the Securities.

Due to this leveraged exposure, investors may be more likely to receive a reduced settlement amount or, depending on the number and severity of Credit Events, may suffer a loss of a substantial part or all of their investment. Furthermore, the Securities provide for the payment of a Remuneration

Amount calculated by reference to the Outstanding Notional Amount, any reduction of the Outstanding Notional Amount following the occurrence of a Credit Event and the related Event Determination Date will result in such Remuneration Amount being calculated on a lower notional basis. Accordingly, investors may receive lower periodic remuneration payments following one or more Credit Events.

The Leverage Factor also increases the volatility of the Securities and may cause their value to decline more rapidly than would be the case for comparable non-leveraged instruments linked to the same Reference Entities. Investors should therefore be aware that the Securities involve a higher level of credit risk and potential loss than investments without such leveraged exposure.

**2. *Risk related to the absence of a zero floor on the Auction Settlement Amount and the Credit Event Cash Settlement Amount***

The Securities provide for the application of an Auction Settlement Amount and/or a Credit Event Cash Settlement Amount which are not subject to a zero floor.

Accordingly, in the event that the Auction Settlement Amount and/or the Credit Event Cash Settlement Amount is negative, such negative amount will be deducted from the Outstanding Notional Amount payable to the Securityholder, subject to an overall floor of zero on the Outstanding Notional Amount itself.

As a result, the amount payable to the Securityholder upon settlement or early settlement of the Securities may be lower than the amount that would have been payable if the Auction Settlement Amount and/or the Credit Event Cash Settlement Amount had been subject to a zero floor. Investors should therefore be aware that, due to the absence of a zero floor on such amounts, the Securities expose them to the risk of receiving a reduced payment compared to otherwise economically comparable securities providing for a zero floor on the Auction Settlement Amount and/or the Credit Event Cash Settlement Amount.
